AN-NAJAH NATIONAL UNIVERSITY

Practical Assignment

OCTOBER 13

Student Name : Ruya Ibrahim

Instructor : Jehad Hamamreh

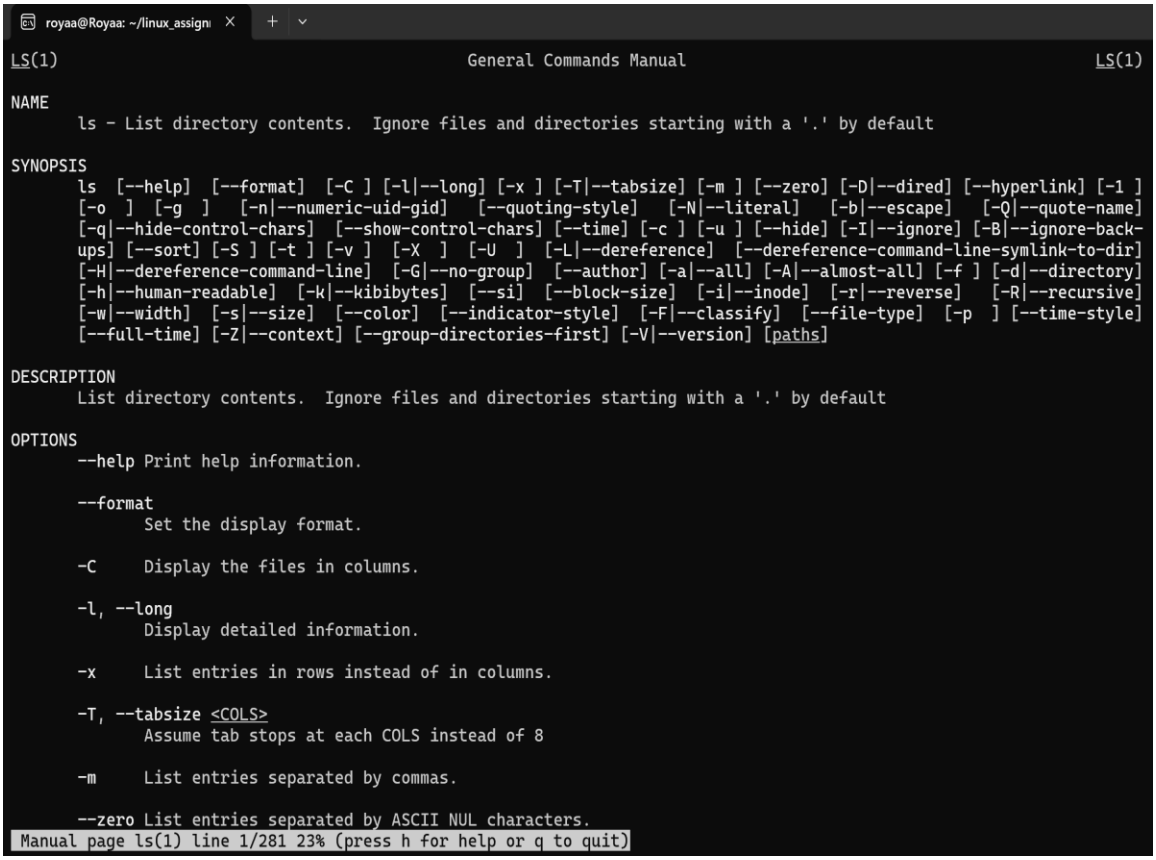

Course : Network and Systems Administration

Screenshot 1: Displaying Directory Contents and File Permissions

```
royaa@Royaa:~$ cd ~
royaa@Royaa:~$ pwd
/home/royaa
royaa@Royaa:~$ ls-la
ls-la: command not found
royaa@Royaa:~$
royaa@Royaa:~$ mkdir -p ~/linux_assignment
royaa@Royaa:~$ cd ~/linux_assignment
printf 'apple\nbanana\napple\nOrange\nbanana\n' > file1.txt
printf 'Ali:20:85\nSara:19:92\nOmar:21:78\n' > file2.txt
mkdir -p dir1 empty_dir
touch dir1/example.txt
royaa@Royaa:~/linux_assignment$ pwd
/home/royaa/linux_assignment
royaa@Royaa:~/linux_assignment$ ls-la
ls-la: command not found
royaa@Royaa:~/linux_assignment$ pwd
/home/royaa/linux_assignment
royaa@Royaa:~/linux_assignment$ ls
dir1  empty_dir  file1.txt  file2.txt
royaa@Royaa:~/linux_assignment$ ls -la
total 24
drwxr-xr-x 4 royaa royaa 4096 Oct 13 21:37 .
drwxr-x--- 7 royaa royaa 4096 Oct 13 21:32 ..
drwxr-xr-x 2 royaa royaa 4096 Oct 13 21:37 dir1
drwxr-xr-x 2 royaa royaa 4096 Oct 13 21:37 empty_dir
-rw-r--r-- 1 royaa royaa   33 Oct 13 21:37 file1.txt
-rw-r--r-- 1 royaa royaa   32 Oct 13 21:37 file2.txt
```

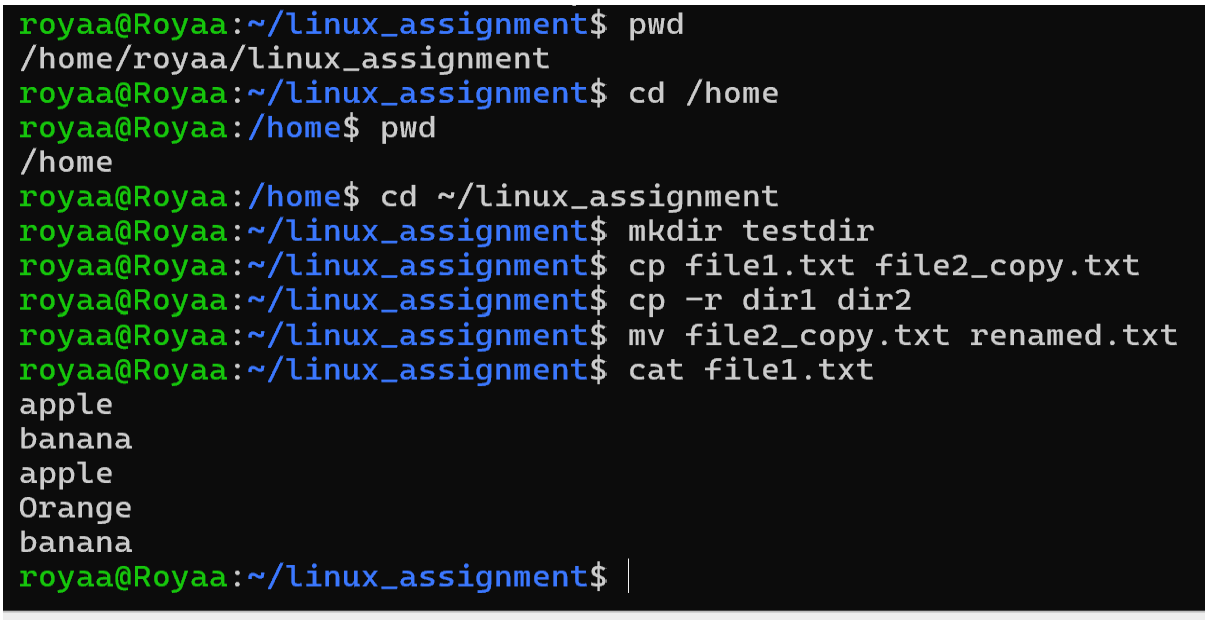

Description: This screenshot demonstrates the use of Linux directory navigation and listing commands, including pwd, cd, ls, and ls -la. The output shows the current working directory, the files and directories inside it, and detailed information such as file permissions, ownership, and modification time.

Screenshot 2: Viewing the ls Manual Page

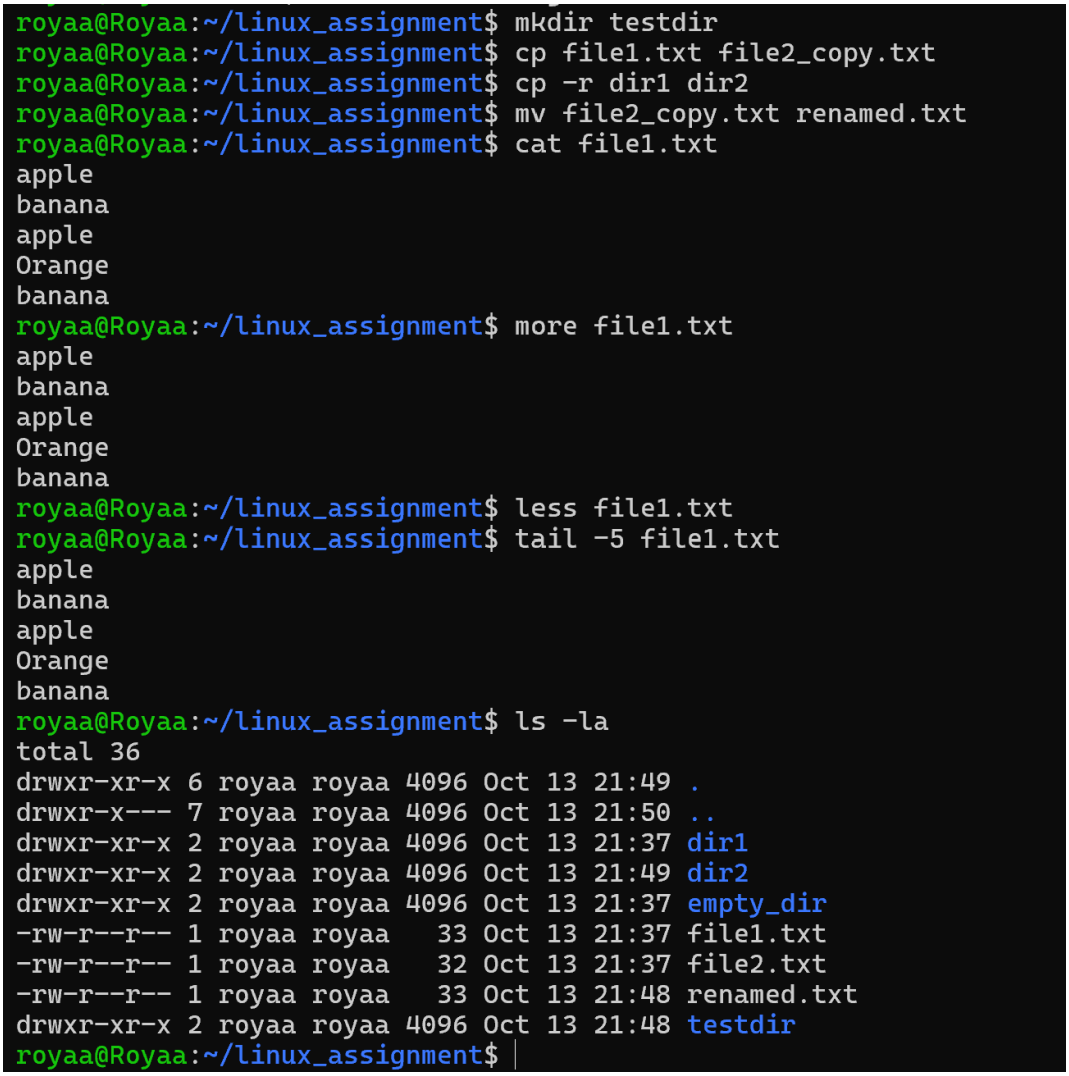

Description: This screenshot shows the execution of the man ls command. The manual page provides information about the ls command, including its purpose, syntax, available options, and usage. The screenshot also demonstrates how to access Linux command documentation through the terminal.

Screenshot 3: Navigating Directories and Managing Files

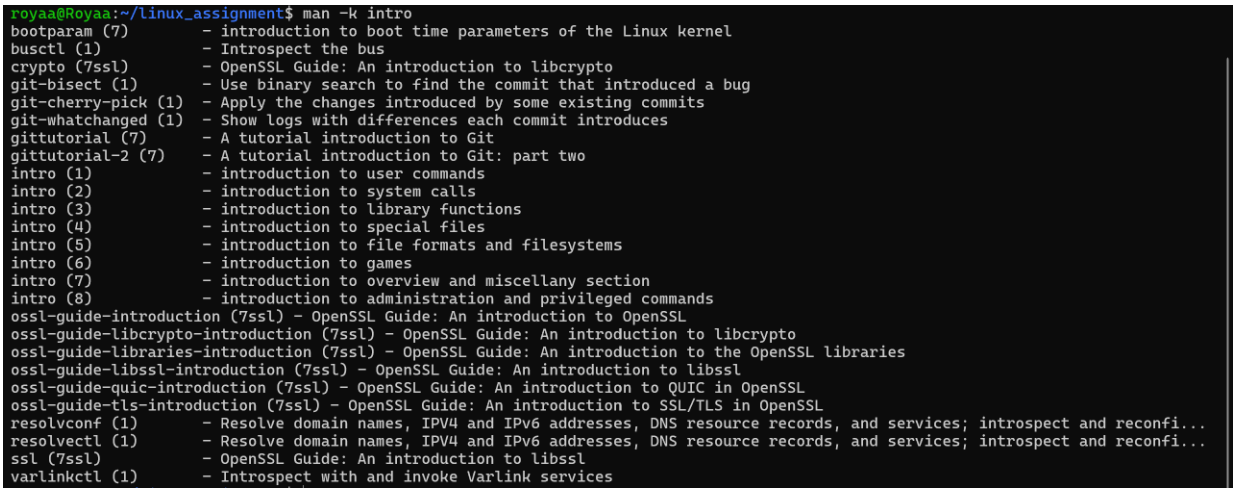

Description: This screenshot demonstrates the use of pwd and cd to navigate between directories, followed by commands for creating directories, copying files and directories, renaming files, and displaying file contents. The cat command is used to print the contents of file1.txt in the terminal.

Screenshot 4: Displaying and Inspecting Text File Contents

Description: This screenshot demonstrates different Linux commands for reading text files. The more and less commands allow interactive file viewing, while tail -5 displays the last five lines of a file. The ls -la command is then used to verify the files and directories created during the practical task.

Screenshot 5: Searching Manual Pages Using a Keyword

Description: This screenshot demonstrates the use of the man -k intro command to search manual page names and short descriptions for entries related to the keyword "intro". The results show matching manual entries available on the Linux system.
